SUMMARY

I'm Alex, an experienced developer proficient in Flutter, ReactNative, IOS ,HTML, CSS, and JavaScript. With around 4-year experience in software development, I bring enthusiasm, creativity, and a positive attitude to cross-functional teamwork and English communication. I excel in Agile methodologies, ensuring timely delivery of high-quality projects while supporting team collaboration and learning.

SKILLS

- Proficient in Dart and Flutter, showcasing expertise in State Management techniques encompassing Bloc Provider, Bloc Pattern, and GetX.
- Basic experience in Swift, UIKit, SwiftUI.Strong experience in HTML, CSS, JavaScript, and jQuery.
- Strong problem-solving and analytical skills.
- Strong understanding of mobile performance optimization techniques.Proficient in spoken, written, and comprehension of the English language.
- Expert in Agile methodologies and project management tools such as Jira.

WORK HISTORY

VMO Holdings
Software Engineer

02/2023 - Present

Reviewing team code, mentoring colleagues, actively participating in daily meetings for team projects, and delivering client-oriented solutions while optimizing software.

Synodus
Mobile Developer

08/2020 - 02/2023

Handling individual project tasks, collaborating in team meetings with project leaders, designing APIs based on client requests, and consistently meeting deadlines.

ON-GOING AND FINISHED PROJECT

Project Viettel Money
Role: IOS developer.

03/2024 - 06/2024

- Number of developer: 4 members.
- Description: The application helps users make payments and transfers, link bank accounts, purchase phone cards and mobile data, pay bills, deposit and withdraw money, manage funds, and utilize third-party services.
- Programming languages & framework: Swift, Object-C, UIKit(MVVM - Clean Architecture), RxSwift.

Responsibilities:
- Upgrade and develop features(Manage data package, Result screen, tracking, ...)
- Review and fix bug
- Improve UI, Ux, performance

App Store Links:

- iOS: https://apps.apple.com/vn/app/sin-hair-care-and-beauty/id1597966621

Project Open Data App

10/2022 - 01/2023

Role: Flutter Developer.

- **Number of developer:** 3 people.
- **Description:** The application helps users to view the state's article information, users can register an account to save their favorite articles and contact the contact agency.

Contributions:
- Developed notable modules such as Article Viewer, Announcement Viewer, and Open Data Viewer.
- Suggested UX/UI enhancements.Debugged, reviewed code, and performed refactoring.
- Implemented WebView in Flutter and integrated Google Maps.
- Utilized CI/CD for continuous integration and deployment.

Project BANCA Coin App

08/2022 - 10/2022

Role: React Native developer.

- **Number of developer:** 5 people.
- **Description:** The application is specifically designed for managing and trading Banca Coin, offering secure buying and selling functionalities, real-time market tracking, portfolio management, and a user-friendly interface for transactions within the Banca

Coin ecosystem.

Contributions:

- Provided UX/UI enhancement suggestions.
- Performed bug fixing.
- Implemented Redux Saga for efficient state management.
- Leveraged blockchain technologies for project development.

Project Civil Servants App

02/2022 - 08/2022

Role: Flutter Developer.

- **Number of developer:** 8 people.
- **Project model:** Bloc Provider.
- **Description:** The application primarily serves state employees by providing tools for statistical job handling, specific work schedule tracking through a calendar interface, and participation in various meetings directly within the app.

Contributions:

- Developed modules including meeting details viewer, meeting participation, text-to-speech, to-do lists, and contact management.Engaged in API design modifications.
- Proposed UX/UI enhancements.
- Performed bug fixing and code review/refactoring.
- Leveraged technologies like biometrics (fingerprint, Face ID), Firebase notifications, WebView, text-to-speech, speech-to-text, and OTP servers (Smart OTP, SMS OTP).

Project Document Management App For Government

08/2020 - 02/2022

Role: Flutter Developer.

- **Number of developer:** 12.
- **Description:** App running on Phone and Tablet helps state officials view decree documents, Draft and assign tasks to ministries and agencies in the city or other departments and at the same time keep track of decrees. and assigned tasks.
- **Design pattern:** MVVM.
- **Contributions:** developing modules for viewing text and task history, bug fixing, and collaborating with API, Backend (BE), and Business Analysis (BA) teams, utilizing technologies such as Firebase.
